

Altima Twin Head

Refrigerant Recovery Machine

New Altima Twin Head from Javac with a **50% faster pumping speed** than its predecessor at **NO EXTRA COST**

Features and Capabilities

- ▶ New V-Twin compressor
- ▶ Most refrigerants, including R410a.
- ▶ High torque AC motor
- ▶ Tuned vibration damping
- ▶ Built in-Condenser
- ▶ 2 Year Warranty
- ▶ Made in Australia

True multi-purpose recovery

R12 R134a R22 R401
 R404 R406 R408 **R410A**
 R411 R412 R500 R502
 R509

In fact, a whole range of CFC's, HCFC's and HFC's with blends and A & B variations.

Comprehensive Manifold

Complete with a selectable Automatic Low Pressure Shut Off. The high performance condenser with fan forced cooling allows you to recover with confidence.

And More...

Safety built in- Ergonomic design means the Altima Twin Head is **easy to carry**. Cool to touch, refrigerant connections that point down away from your eyes, safety switches, thermal overloads, circuit breakers and convenient connection points all on one side of the unit.

Needless to say, the Altima Twin Head has all the bases covered and is built to stringent Australian standards for quality and performance.

TECHNICAL SPECIFICATIONS

Key Features

- 0.3 Kw motor
- Weight: 11kg
- Size:
 - 420mm (L)
 - 290mm (W)
 - 420mm (H)
- Twin Head 1/2 HP compressor
- Oil free compressor
- Ceramic bearings
- Automatic shut off
- Integrated self purge
- High power fan cooling
- Integrated low pressure control
- Low pressure control manual override
- Purge Facility
- HP and LP gauge fully enclosed
- Integrated circuit breaker protection
- High capacity condenser
- Connection fittings 1/4 SAE
- Recovery hose included

Additional Features

- Recovers most refrigerants
- Easy to clean inlet filter
- Robust blow moulded case
- Two year warranty
- Australian designed
- Australian manufactured

2 year warranty

Designed and Manufactured by Javac in Australia.
