

KONFORT 710R

New model designed for Australian workshops

Australian Auto-workshop owners demanded a new fully automatic A/C charging station And it had to be...

- More affordable,
- Simpler to look after
- More robust under all-day Aussie conditions
- Accurate when charging

We have listened and delivered

The Konfort 710 features quality components from one of Europe's best known manufacturers of A/C servicing and automotive diagnostic equipment - trusted by the top marques for their own dealer network A/C servicing.

We have stripped out all the bells and whistles to leave a very reliable no-nonsense machine for the hard working Aussie Auto Service Centre.

More importantly, now everyone can afford the European build quality of a world wide brand.
